Earthquake Preparedness

Curriculum Section, April 8th, 2024

Steps when an Earthquake Strikes

When an earthquake strikes

Indoors : Hide underneath a sturdy table and hold on to table legs firmly with both hands.

Outdoors : Squat down and protect your head from falling stuff.

Where to hide : Underneath a table, beside a pillar, near a concrete wall

After the earthquake stops

Remember **Don't Push, Don't Run, Don't Talk, and Protect Your Head.** Then evacuate to an open area orderly.

Steps when an Earthquake Strikes

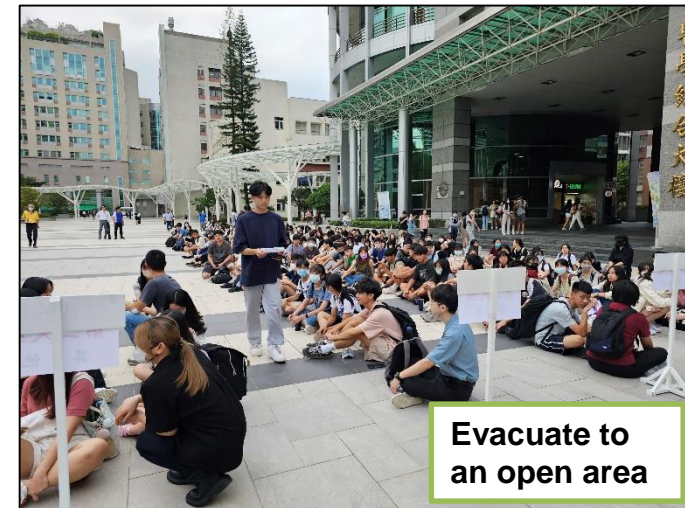

Drop, Cover, Hold on

Evacuate after earthquake stops

**Don't Push, Don't Run,
Don't Talk, Protect Your Head**

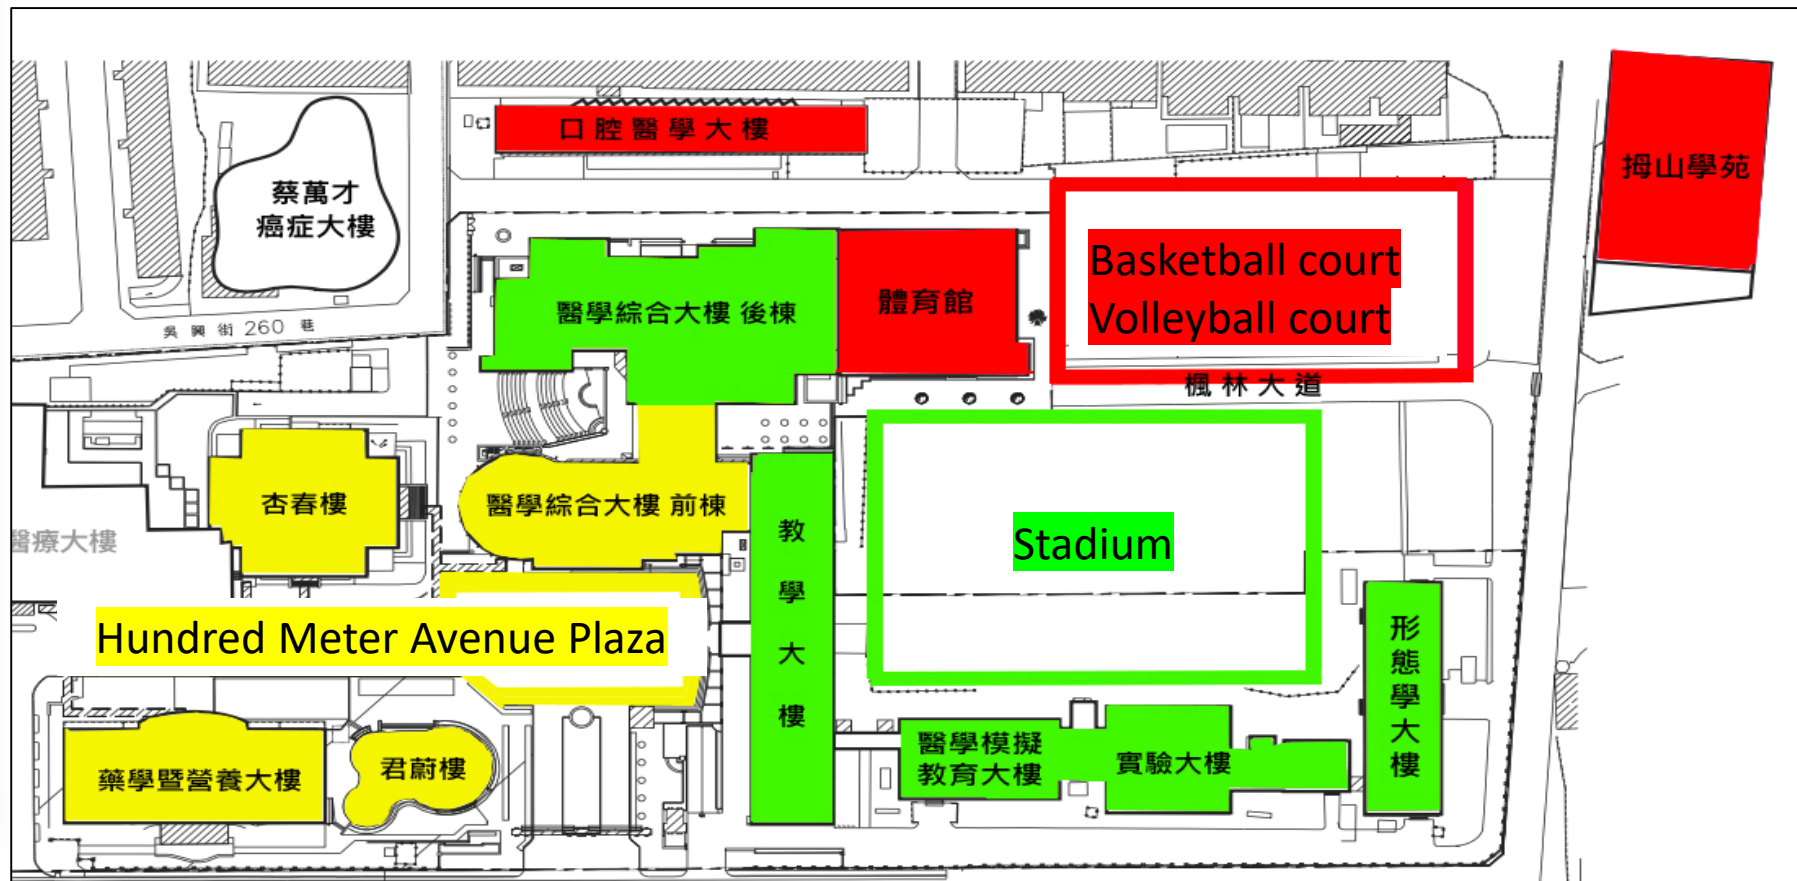

Evacuate to an open area

Evacuation Guide in Xinyi Campus
